Registration Dates

Contacts

We are excited to introduce this first edition of the MTECH Counselor Newsletter. This newsletter will serve as a way for us to inform you of new things happening at MTECH. You will find news of new programs, registration dates and contact information to keep you connected with your MTECH recruiters. Not to mention student success stories, announcements and ways you can help your students find their path in technical education.

Welcome!

Counselor Webpage

Welcome to your very own High School Counselor Web page. This will be your one stop shop for questions about MTECH. Here you will find frequently asked questions, tour schedules and a material request form. We will update you with upcoming events, recruiter contact info and program changes. Look for this webpage on our website starting January 2019.

Scholarships

CTE Scholarship Application due February 1st, 2019. This scholarship is for graduating high school seniors and will cover tuition costs. For more information please contact Mark Middlebrook.

More Growth!

To help facilitate our growing student body we will be expanding our Lehi Campus. The Lehi Trades Building is set to begin construction in February 2019. This building will house some programs that were previously only offered at our Orem Campus such as welding and machining.

Registration Dates

Defined Entry Program/Courses for Summer Semester: 1/7/19
Cosmetology (June start): 3/19/19
Nail Technician Accelerated (June start): 3/19/19
Defined Entry Programs/Courses starting in August: 4/23/19

Cosmetology (August start): 6/4/19
Nail Technician Accelerated (August start): 6/4/19
All Open Entry/Open Exit Programs/Course registration dates
can be found online or by calling 801-753-6382.

MTECH Student Ambassador Program

We are excited to announce the new MTECH Student Ambassador program. This is a scholarship and leadership opportunity for our students to serve their school, gain life skills and build their resumes. Help your students get up to a \$2,400 scholarship by encouraging them to apply to be an MTECH Ambassador. Our Ambassadors are student leaders involved in marketing and recruitment for MTECH. They give potential student tours, presentations about MTECH, and help us connect with students on social media. All MTECH students, high school students included, are invited to apply to be an ambassador. We are looking for hard working students who are open to opportunities for growth. If you have a student who is interested in leadership, marketing, presenting/public speaking or scholarship opportunities please contact the Ambassador Adviser, Ashtyn Heninger, at aheninger@mtec.edu for more information.

Central Sterilization Program

MTECH just launched our new Central Sterile Technician program! This program is currently offered in the evening at our Lehi campus. The central sterile processing technician plays a vital role in maintaining the cleanliness, functionality and inventory of health care instrumentation and equipment. Their work ensures that patients avoid infections and that doctors, nurses and allied health professionals are able to access the instrumentation and equipment they need immediately. As a central sterile processing technician, you are responsible for sterilizing instrumentation and equipment through a series of critical steps. You will have a strong understanding of microbiology and infection control, the principles and practices of sterile processing and decontamination procedures.

New MTECH Provo Campus

We look forward to taking possession of the 4th District Court Building in the Spring of 2019. It is our intention to remodel the building over the next few years to be able to offer as many programs as possible in Provo. The hope is to be able to open Nurse Assistant, Medical Assistant, and Information Technology at the Provo Campus in the Fall of 2019. Construction schedules could always change that plan, but we will be working hard to make the Fall 2019 opening a reality.

Exciting Equipment

The Anatomage Table is a virtual cadaver. Students can look at the different layers and systems of the body. They have the ability to look at an actual MRI image from different angles and can even touch different body parts on the screen to see what it is. The program has some amazing features for education. MTECH is lucky to have the Anatomage Table to enhance learning for our students in the health fields.
